

## GLASS

We accept glass of all shapes, sizes, & colors. We appreciate it if it isn't broken, but hey, it's glass. These things happen. We understand.

## ALUMINUM

It really doesn't matter to us what was in the can, as long as it ends up in the blue bin. Pop the top, enjoy the beverage, & toss the can our way.

## PLASTIC (Nos. 1 - 7)

It seems complicated, but it isn't - just check the bottom of the container. If you see a #1, #2, #3, #4, #5, #6, or #7 inside that teeny recycle symbol, place it in the bin and we'll do the rest. Simple.

## STEEL

Beans, beans, the musical fruit.

The cans they come in can be recycled to boot!

(While often called "tin cans" they're actually made of steel. Blue bin 'em!)

## PAPER & CARDBOARD

Is it paper? Then the answer is "YES!"

All we ask is that you flatten your cardboard boxes and place them under your bin.
